## PerformanceTrak News- November 2015 Results

## At A Glance: November 2015 Recap

The average number of rounds played during November 2015 increased by $22.5 \%$ over November 2014 with the number of days open up $16.7 \%$. In addition, November was the fifth consecutive month in 2015 with positive growth in rounds played. This monthly comparison resulted in the highest monthly percent change we have seen this year thanks to significantly warmer weather across most of the country.

The ample growth in November rounds had a significant impact on year-to-date figures with YTD rounds played up $2.9 \%$ over the same period last year and a full percentage point from last month's report. Approximately 99.0\% percent of the annual golf rounds have been played through November.

Golf facilities posted positive year-over-year growth in each of the four key revenue indicators for November 2015 and YTD as compared to 2014. The YTD November 2015 increases in median facility revenues ranged from $+2.3 \%$ for golf fee revenues to $+5.5 \%$ for food and beverage revenues. This November marks the third consecutive month for year-over-year growth in each of the four key revenue indicators. For the month, golf facilities reported their second largest year-over-year (YOY) increase in total facility revenue, up $6.8 \%$, while food and beverage revenue had the largest percent change, up 19.8\%, versus November 2014.

| 1 Rounds played, days open, and revenue data are weighted by state and facility type. <br> ${ }^{2}$ Median gross revenues exclude responses where one value of the paired data was missing (i.e., a $\$ 0$ value). <br> ${ }^{3}$ Performance Factor is an index of rounds played per day open, where 100.00 represents consistent play on a per day basis. <br> 4 Total facility revenue is comprised of Golf, Merchandise and F\&B revenue (those metrics measured by PerformanceTrak) and further includes any and all <br> other revenue items at a facility including dues and membership fees. |  |  |  |  |

## PerformanceTrak State Results and Weather - YTD November 2015 Recap

At the conclusion of YTD November 2015, a total of 35 states posted year-over-year increases in golf rounds played and four states increased their play with fewer days open. The largest increases in year-over-year growth took place in Maine, West Virginia, states surrounding the Great Lakes and the Dakotas. According to NOAA, this period has been the warmest since 2012 and record warm temperatures were experienced in Florida, Nevada, Washington and Oregon. Despite the prominence of states with warmer conditions, YTD 2015 was the ninth wettest on record in the past 121 years, mostly across the central and southeastern U.S. Additionally, record wettest conditions were observed in Oklahoma.

PerformanceTrak: U.S. Map of Rounds Played Year-to-Date \% Change by State - November 2015

Below are weather maps for November 2015. These provide a snapshot of weather conditions and help provide insight on state performance and demand for golf. The eastern and central portions of the U.S. were much warmer than usual in November allowing golf facilities to remain open for play. Out of the 2,600 facilities that submitted November data this month, only $5.0 \%$ of these were closed for the season.

[^0]State-by-state results below highlight rounds played and days open for November 2015 in comparison to 2014. At the state level, 36 states reported positive growth in rounds played. The Northeast was much warmer/drier than usual this month which provided the opportunity for increased play this time of the year. In contrast, states in the West, Northwest and Southwest reported a colder than usual November which led to declines in available play this year with the exception of Idaho and Washington (growth in rounds with fewer days open). Heavy precipitation continued as the trend this month, however nineteen states that noted much wetter conditions also reported increases in rounds played.

Note 1: States displayed are those that have sufficient sample size and sufficient days open for reporting. Regardless of display, all responses are included in the "All States" value for nationwide results.
Note 2: Results are based on weighting by facility type and state.

## About PerformanceTrak

PGA PerformanceTrak in Cooperation with the NGCOA is the industry's leading rounds and revenue data collection and benchmarking service. Reports are available by PGA Section, state and over 70 local markets. Golf facility operators also have the ability to benchmark their facility's performance against their competitive market through our online reports tool. A dedicated team at the PGA of America National office gathers data monthly to support participation and benchmark reporting across the country and to assist with customer service inquiries.

[^0]:    For the maps above: The numeric value within an area represents where it falls within the rank from 1 to 121 which covers the historical period of record-keeping (121 years). It is sorted from highest to lowest value (Coldest/Driest to Warmest/Wettest). For example, if the value equals 13 on the 1 to 121 scale, it represents the 13th coldest / driest period on record. A value of 109 would represent the 13th warmest / wettest.
