What can the Mike Calbot International Golf Academy do for me?

***Offer you quality golf instruction
and a unique learning experience!***

Mike Calbot will help you to establish short and long term goals by understanding your pathway for success by skillfully developing your personal ***Planned, Progressive, Practice*** program to achieve those goals. Through his unique analysis process and his effective art of communication, encouragement and personal support, to help you stay focused, you will see guaranteed improvement.

Most golfers never enjoy learning and making steady realistic improvement because they do not have a personal program designed for success.

We use state of the art video equipment to single out the most important areas that need to be addressed and to show changes and improvements made.

My approach is to work with the student's individual needs taking into consideration all factors such as age, physical condition and time available for the game.

Where we are different is that the entire session is on a take home DVD, not just a few swings. Your swing analysis, the root cause of the problem, your instruction and all demonstrations, corrections and any discussions, are taped for your personal recall for years to come.

Because each client is uniquely different, a file is established which has the personal information that has been discussed during your sessions and may be pertinent to your improvement, along with former issues, corrections, drills, exercises and key points needed for your progress. This file can be accessed by Mike Calbot for remote assistance if needed. Mike can also send video corrections by email when necessary.

Our golf studio publishes newsletters that include informative golf tips, information and deals on equipment, and travel. Mike will list his appearances and golf exhibitions/clinics which may come to your town. As you can see, the many services that are offered are all part of the Mike Calbot Golf Studio unique learning experience.
