

# 2011 Toro 4500D

We've recently upgraded to a new rough unit and we're looking to sell our current setup. We have a 2011 Toro 4500D with 3,9XX hours that is pre Tier 4 emissions standards and has been a strong running machine for us. It is equipped with 4wd and mulching blades. We haven't found a hill too steep for this machine to operate as it should with no slipping.

\$20,000
