

# TEE 2 GREEN

## Golf Course Update

February brought some much-needed rain to Bonita National. The weather has been wonderful for both the players and our turf. Our new fertility program continues to yield positive results and the course is holding up beautifully.

Keep our golf course looking great. The following is the proper method to filling a divot:

Using divot mix, it is important to avoid over or under filling divots. Under filling a divot will result in a depression that affects golf ball lie. On the other hand, overfilled divots will damage mowing equipment and create poor playing conditions. To properly fill a divot, bend over and directly place divot mix in each divot, making sure the divot mix does not spill onto undamaged turf. Add divot mix until it is even with the base of

the adjacent turf. Finally, just as with replacing divots, use your foot to compact and level the divot mix.”

If you should have any questions or concerns about the golf course, or any of the agronomic procedures that we perform out on the golf course, please don't hesitate to contact me, my office door is always open and I would be more than happy to explain any situation that we perform on the golf course.

Highest Regards,

Jesse Metcalf

**ANNUAL  
MEETING  
DATE & TIME  
CHANGE  
Monday, March  
16 at 5:00 pm  
Clubhouse**
