TURF TALK

As the course begins to emerge from another winter season, we have been busy aerating and fertilizing fairways, tees and roughs. This will help to facilitate a more rapid recovery of areas affected by spring dead spot and winterkill.

Although we have experienced some turf damage, fortunately it is significantly less than what we struggled with last season. These areas will recover with steady fertilization and warm summer weather. The greens continue to improve and fill in. Our focus will be to recover all bare spots particularly on greens 6 and 15. We will continue to fertilize weekly and topdress with sand to speed recovery and ensure surface smoothness. We are also plugging larger areas to aid in recovery and will continue to do so until the greens are completely healed.

Tree work continues as we remove several trees from the course that had been cut down this past spring. Weed eradication continues course wide as we employ both pre and post emergent controls to lessen populations. As our weather improves we hope to see you on the course.

No Fishing!

While we understand the ponds are very attractive to those that like to fish, it is very dangerous to fish on a golf course. No Fishing is allowed and if you see anyone fishing, please report it to the Pro Shop. The Golf Course, Lee's Hill, accepts no liability to those that get injured while fishing on the golf course
