Turf Talk

Turf Talk September 23, 2022

Cooler fall weather has finally arrived here at Lee's Hill. Our year end fertility program is underway.

We will be treating greens, tees, fairways and roughs with a combo product which includes pre emergent herbicide for cool season weed control.

The bermudagrass on the course will continue to grow until frost and cooler weather becomes more prevalent next month. Greens are recovering nicely from a tough stretch of weather experienced this past August. Granular applications of fertilizer, gypsum and potash have helped to improve soil conditions for optimal turf growth. In addition, extra sand topdressings have been applied to help fill in areas damaged this summer.

The pesky goosegrass plants that germinated on putting greens late in the summer have been treated with a selective herbicide. This material initially turns the plant white, inhibiting photosynthesis leading to necrosis and death in a few weeks.

We look forward to seeing you on the course this fall!
John Burns GCS

Joggers, Walkers & Site Seers!!

Fall foliage will be in bloom very soon. With it comes all the beauty that is a golf course!

While we do appreciate our many joggers, walkers, dog walkers and site seer, we ask that they would use the community paths instead of the golf course cart paths.
