### **TURF TALK - John Burns, GCS**

Leaf blowing season and cooler fall weather has descended on Lee's Hill Golf Club. We have two high volume blowers in our inventory. The Toro pull behind blower is towed by one of our utility vehicles and is very effective at maneuvering in tight spaces, around tees and green surrounds for example. Our second unit is a tractor mounted PTO driven type that is larger and more effective in open spaces such as fairways and roughs. I'm sure you will see them on property often, along with our back pack units that we rely on to keep the greens cleaned off.

Cooler weather arrived a little early this year, with overnight temperatures in the teens at the beginning of the month. This colder fall weather has predictably resulted in the dormancy of our warm season bermudagrass tees, fairways and roughs. We were able to apply a late season fertilizer to help the turf harden off and improve its ability to better survive the winter. With diminished turf growth the plants ability to recover becomes diminished. With this in mind, it's very important to adhere to the 90 degree rule when accessing the fairways.

Also please remember to repair divots and ball marks to facilitate faster recovery. The use of the turf mats on the driving range is also encouraged as winter weather begins to set in. Looking forward to seeing you on the course this fall!

### **Holiday Gratuity**
