2016 March Madness Match Play Challenge

Match Play qualifying rounds- Play as many 9 hole rounds as you want February 1st – 22nd to qualify to play in the March match play bracket. The Lowest (Net) Score you turn into Pro Shop for February will be your qualifying score. Once I have the top 32 players (Net) from the qualifying stage I will Seed them 1 thru 32 and make a bracket.

Cost **\$20** to enter and each round played will be normal 9 Hole Winter GF in qualifying stage and Twilight GF during bracket play.

Bracket will be constructed with the top 32 players and posted online the 23rd. There will be a players list with phone numbers (also online) to get a hold of your competitor to set up a time to play your matches in the allowed time frames. The lower seeded player is responsible for contacting his opponent. If matches are not played on time they will be decided by a coin toss to see who moves on. Winter Rules will be in effect and all matches are 9 holes. (Final 4 Matches are 18 holes)

Playing your match: The player with the lowest handicap becomes the baseline handicap and plays at scratch, meaning he doesn't get any handicap strokes. The other player gets his handicap strokes by subtracting the other player's handicap from his. For example, your handicap for this course is 15 and your opponent's is a 6. Subtract 6 from 15; your handicap is 9 and your opponent plays scratch. Which means you would get a stroke on the 9 hardest holes indicated on the scorecard. Standard match play rules in effect meaning you can give putts as you wish. When you're finished with your match turn your scorecard into the Pro Shop.

February 1st – 22nd

Qualifying Rounds
