DESIGN & CONSTRUCTION

BunkersPlus ~ Jeremie Smith

520-251-3716

"Linebacker is an effective and efficient innovation," said Kip Wolfe, principal of BunkersPlus, LLC and its sister company, Key Golf Management, LLC. "It is the best defense against the prevention of bunker sand contamination and wash outs. Linebacker's proprietary formulation is made up of natural materials fortified with eco-friendly polymers that provide strength with longevity."

Casa Verde Golf ~ Jeff Schwinkendorf

CASA VERDE GOLF
MAINTENANCE | CONSTRUCTION

Casa Verde Golf is a boutique golf course construction and construction management company specializing in high quality new build and renovation projects of all sizes. Based in Scottsdale, AZ, we have significant experience and expertise, with a proven track record in ensuring that all of our projects are performed to the highest standards, on time and within budget. Equally as important is the pride we take in our ability to adapt to any fluctuations within those elements, so that the quality of the end-product is preserved, buying power of the dollars spent is maximized and critical dates are met.

 - Soil testing and fertility programming to fit the customer's needs
 - Chemistry and programming for disease and weed management
 - Customer service which includes infield support and problem solving
 - Timely deliveries, quality products and great service

**Crop Production Services ~ Dan Kellar, Mark Kellar,
Bob King, Shane Powell, Gigi Nitka & Kyle Roland**

602-390-1471

Crop Production Services (CPS) was established in 1983, but predecessor companies began operating as early as 1859. A lot has changed since then. Advancements in technology allow for more effective growing methods while minimizing environmental impacts. We've welcomed more operations into our family and expanded our product and service offerings. Our reach has become global as we are now part of a network of retailers that spans three continents. Despite all those changes, we have never lost sight of the American farmers and the work they do. Decade after decade, we're here to provide the best technologies, tools and products so you can focus on what you do best - grow.

**Eco Works Supply ~ Doug Daniel, Jay Osegueda,
Tony Klenske & Duane Williamson**

612-868-9615

Eco Works Supply started business in 2002 as Cycle Works of Minnesota. The name Cycle Works was used due to the supplier of products initially was Cycle Works, based in Colorado. Cycle Works Golf Supply has expanded its product lines over the years and it also has expanded to the sports turf and park and recreation marketplace a decision was made to change the company name to Eco Works Supply. That name was chosen because it reflects the focus on ecological friendly products and distribution to other industries besides golf. All products are still the same. All Cycle Works product names sold by Eco Works Supply are now labeled Eco Works. In 2011 an on-line company www.ecoworksgolfsupply.com was created to distribute the most popular turf products. All of the product information can all be found at the www.ecoworkssupply.com web site.

Grigg Brothers ~ Michael Steve

208-227-7034

Grigg Brothers has proven itself to be a valuable partner in the golf and sports turf industry since 1995. Their Proven Foliar™ liquid and GreenSpec™ granular fertilizer technologies are backed by many years of independent university research and extensive field trials. Grigg Brothers offers turfgrass managers and greenkeepers fertilizer solutions with unmatched quality, performance, and compatibility.

Huma Gro Turf ~ Michael Gardner & Kenny Halcomb

480-250-7519

HUMA GRO® TURF is a line of products developed and manufactured by Bio Huma Netics, Inc. of Gilbert, Arizona. Bio Huma Netics started developing high efficiency liquid soil health and plant nutrition products in 1973. The Micro Carbon Technology® (MCT) that we use as the base of all our ingredients is proven to be many times more efficient than conventional fertilizers; several times more efficient than granular fertilizers and a few times more efficient than the highest quality chelates. The extremely small molecule size in our MCT makes the difference.

PBI Gordon ~ James Sorensen

360-623-3012

Founded as Private Brands Incorporated (PBI) in the fall of 1947, our company was built on an attitude of basic honesty and forthrightness in all matters and a "bend-over-backwards-to-please" attitude towards customers. This was the approach of our founders, and from the beginning it gained the company the respect of the entire industry. Our commitment to quality in our manufacturing processes gained us private labeling contracts with many major firms in those early years.

Stabilizer Solutions, Inc. ~ Jim Hubbs

602-225-5900

Soil moisture research has uncovered that the ideal playing surface requires 4-12% moisture to achieve natural binding for shear and load bearing strength required by the athlete. Simply put the ideal playing surface has a DAMP SOIL CONSISTENCY. Stabilizer Water Binding Technology keeps your field's ideal moisture content window open longer. It binds water and soil particles, maintaining stability during rain and releasing moisture into the soil when dry, providing a damp soil consistency longer. Please contact us at: info@stabilizersolutions.com

Syngenta ~ Kimberly Gard

760-390-5117

Syngenta Lawn & Garden North America, headquartered in Greensboro, N.C., is organized into three main customer categories: Turf & Landscape, Syngenta Flowers Professional, and Consumer. The organization's mission is to provide innovative, integrated solutions to enrich the living experience of its customers. In support of this mission, L & G NA conducts business in three key areas: chemical control products for use in turf, ornamental, vegetative management and pest control; genetics (which includes seed and vegetative cuttings); and growing media. While the majority of the organization is focused on golf courses, professional lawn care operators, and greenhouse growers, L & G NA also works closely with leading retailers to target the consumer market segment with innovative offerings.

The Catalyst Product Group ~ Mark Turner

480-814-8318

**The Farms Choice ~ Jim Marshall, John J. Harper
& Bill Vangotum**

623-872-2331

The Farms Choice came about because of our ability to see a win-win solution when it came to a steady supply of a natural byproduct of egg ranching. Eggs require hens, and hens create a lot of waste as part of their daily routine. Their steady supply of a potentially useful resource was the beginning of a way for everybody to benefit. Chicken manure has long been prized as one of the best fertilizers available on the planet because of its high levels of nitrogen, potassium and phosphorus. From commercial growers to home gardeners, it has long been believed that the high nitrogen and balanced nutrients is the reason that chicken manure compost is the best kind of manure to use. The Farms Choice removes the guess work from using a natural product, and eliminates any odor that is often associated with the use of any manure. It's clean, virtually scent-free, and simple to use. It also recycles a very valuable byproduct that otherwise might go to waste. Another real recommendation for the use of The Farms Choice is that it is completely safe around pets, children, and other living creatures. There is no mandatory waiting period after its application. You can put it on a lawn or playground, and let the kids go back to playing. According to the EPA, 249.6 million tons of municipal solid waste or MSW (more commonly known as trash or garbage) were generated in the United States in 2008. Organic materials are the largest component of trash and make up more than two-thirds of the solid waste stream. 36 percent of the materials in a landfill are green waste – much of which could have been recycled.

Sage Tree Care ~ Cliff Frink

602-329-1352

Cliff Frink, Owner: Cliff is a certified Arborist (certificate number: WE-7925A) and earned a BS degree in Agronomy from the Ohio State University. He started Sage Tree Care after a successful career in golf course maintenance where he managed some of Arizona's finest private and public courses. Cliff saw an opportunity to combine his passion for science and nature by providing outstanding tree care to discriminating clients.

Sage Tree Care Team: Sage Tree Care employs highly skilled and highly trained tree care professionals that share a passion for proper tree care. It is imperative for all employees to love what they do in the tree care business; the work is too physically demanding and it's too easy to take shortcuts. All of our employees start out 'dragging branches' for months and undergo intense hands-on training before being asked to prune or climb. All of our climbers understand the nature of each tree and how it is growing before they prune it.

Werecon ~ Joe Wantulok

602-256-0573

WERECON Inc. Manufactures high quality fertigation and acid injection systems. Based right here in the valley for over twenty years, we can build the perfect system for your needs and be at your service year after year to keep it running at its best!
