

Career opportunity as a service technician in the golf irrigation division

Midwest Turf & Irrigation is seeking a service technician in the golf irrigation division. The technician will be responsible for repairs and upgrades involving golf course irrigation systems. The position requires an ability to create a partnership with industry professionals by being a resource for their irrigation needs. The technician needs to display a high standard of professionalism and ethics while representing Midwest Turf when troubleshooting repairs and upgrading systems. The service area will include Nebraska, South Dakota, and western Iowa. Ideally, applicants will have experience in troubleshooting and upgrading Lynx and SitePro systems; be able to work on LTC, Osmac, VP Lynx smart satellite and Lynx smart module 2-wire control systems; and have the ability to upgrade satellites and controllers as needed.

Midwest Turf provides a great working environment for its many long-term employees. Benefits include training, a company truck, expense account, health care and disability insurance, 401k match and profit sharing, and generous vacation days and holidays.
