MEMBER SURVEY COMING SOON GOLF, TENNIS AND SOCIAL MEMBERS

We are well into the stages of the development, distribution schedules, questions, preferences, satisfaction levels and added comment sections. We have agreed upon the services of a third party auditor that will tabulate the survey responses and statistics to ensure anonymity of respondents and data coordination.

This survey is very important to the HOA and club management. The information we gain will assist us in quantifying and qualifying goals and tactics for the future based on macro and micro data determined.

One survey will be accepted by the auditor per membership. The primary email associated with your membership on file with the club will be used. If you have more than one email; all others will not be used. Emails not associated with the club's information will not be tabulated. This is to make sure only one survey per membership is tabulated.

In October, we will distribute a written summary and analytic statistics along with summarized actions plans based on the responses. Needless to say, we would sincerely appreciate and encourage each member household complete the survey. The last survey taken by the HOA proved critical to the eventual decision to purchase the amenities.

This survey will assist us greatly in guiding us towards a culture that the membership desires. As noted previously, the membership builds the culture and management oversees projects, processes and operations to carry out these visions successfully. Please be counted!
